EDUCATION

Northeastern University
Master of Science in Data Analytics Engineering **May 2026-Present**

University of Illinois Urbana-Champaign
Bachelor of Science in Statistics and Minor in Recreation, Sport, & Tourism **August 2021-May 2025**
Data Science DISCOVERY Certificate **May 2025**

Google Data Analytics Professional Certificate – Coursera (Google) **October 2025**

Selected Courses: Statistical Modeling I & II | Statistical Programming Methods | Statistics and Probability I & II | Time Series Analysis | Linear Algebra | Baseball Analytics | Professional Statistics | Data Science Programming

RELEVANT EXPERIENCE

Applied Technologies @ College of Liberal Arts & Sciences **Champaign, IL**
Machine Learning & AI Intern **August 2024-December 2024**

- Built **predictive models** in *Python* and *R* using **XGBoost, and GBM,** improving accuracy of student success forecasting.
- Designed **interactive Tableau dashboards** with UI/UX design principles, making educational KPIs accessible to all stakeholders.
- Conducted **exploratory data analysis (EDA)** on large-scale academic datasets to uncover performance trends and actionable insights.
- Collaborated in an **agile team** environment, applying iterative development for data pipeline optimization and dashboard enhancements.

Applied Technologies @ College of Liberal Arts & Sciences **Champaign, IL**
Business Process Improvement Intern **May 2024-August 2024**

- Analyzed workflow data and built **custom dashboards via Power BI** to visualize process efficiency across multiple LAS departments.
- Streamlined internal reporting for **University Housing,** digitizing key processes and reducing manual data entry time.
- Partnered with cross-functional teams to enhance **University Police K-9 data management system,** improving record linkage and reducing redundancy.
- Presented **data-driven recommendations** to leadership, improving operational efficiency and departmental transparency.

PROJECTS

March Madness Seeding Analysis **February 2025 - April 2025**

- Built and trained an **ordinal regression model** to classify NCAA team seedings and forecast future March Madness tournaments.
- Integrated both team-specific and contextual variables into the model, achieving **94% test accuracy**.
- Produced a **detailed report and presentation**, effectively translating analytical insights into actionable recommendations.

Carbon Dioxide Emissions Consultation **August 2024 - December 2024**

- Conducted **exploratory data analysis** on turbine sensor data, identifying key operational parameters influencing CO emissions.
- Developed **predictive models using regression and machine learning techniques** to recommend actionable strategies for reducing CO emissions such as minimizing the variables that cause significant pollution.
- Collaborated with a client team, translating technical findings into **business recommendations** for environmental performance.

SKILLS

Data Analysis & Visualization: Tableau | Power BI | ggplot2 | Matplotlib | RShiny | Excel | Google Sheets
Analytical Techniques: Data Cleaning | EDA | Regression | Time Series | A/B Testing | KPI Tracking | Dashboard Design
Programming & Statistical Tools: Python | R | SQL | SAS
Libraries & Packages: Pandas | NumPy | Seaborn | Scikit-learn | Tidyverse | Caret | Markdown
Cloud & Databases: AWS S3 | AWS Lambda | Amazon RDS | Redshift
