

WEEK 4 ACTIVITIES

Pizza Order Form

Pizza Ordering Form Phases

- Data Collection
- Customer Confirmation
- Kitchen
- Delivery Driver

Data Collection Phase

In the data collection phase, I split it into two sections:

- Personal Information
- Create your Pizza

The personal information section asks the customer to provide their name, email, phone number, and address. It also asks for any notes about how the delivery should be handled.

Create your Pizza offers customers a variety of different sizes, crusts, and toppings (Meat and Non-Meat). I put a multi-line text box to provide special instructions about how the pizza should be baked.

Customer Confirmation Phase

After filling out those sections and confirming payment, the next step in the workflow diagram is routed to the Customer Confirmation phase.

After submission of the Data Collection phase, the customer will receive an email with a summary of their order to confirm everything looks correct.

This will act as the receipt for their order and along with their summary will provide the total cost.

Kitchen Phase

The next step in the diagram is the Kitchen phase. This is where the Create your Pizza section is sent to the kitchen to bake the pizza.

In this section, the only information needed about the customer is the pizza they selected which is indicated by the Create your Pizza section of the Data Collection phase.

Delivery Driver Phase

The last phase of the diagram belongs to the delivery driver. After the pizza has finished baking, it is handed off to the delivery driver for delivery.

The necessary information of this phase is the Personal Information section about the name and address. I also added the Create your Pizza phase as a way to ensure the customer does not get the wrong pizza.

Other Important Information

Cost is based on Size and Toppings

- 10" costs \$9
- 12" costs \$11
- 14" costs \$13
- 16" costs \$15

Bacon, Ham, Salami cost \$1.50
Other meat toppings cost \$1
Non-meat toppings are free

Quantity of Pizzas Ordered

I allowed a customer to order between 1-15 pizzas for their order.

Variety of Customization Options

Some of the different customization options within Create your Pizza include:

- 4 options for size
- 4 options for crust
- 6 options for meat toppings
- 6 options for non-meat toppings
- 3 options for dipping sauces
