HUFF'S NUMBERS REVIEW

After last week, I thought more could've been done with the team's form so I took it upon myself to review Huff's Numbers for more insights and inspiration when creating the form contents section. I found some useful information such as:

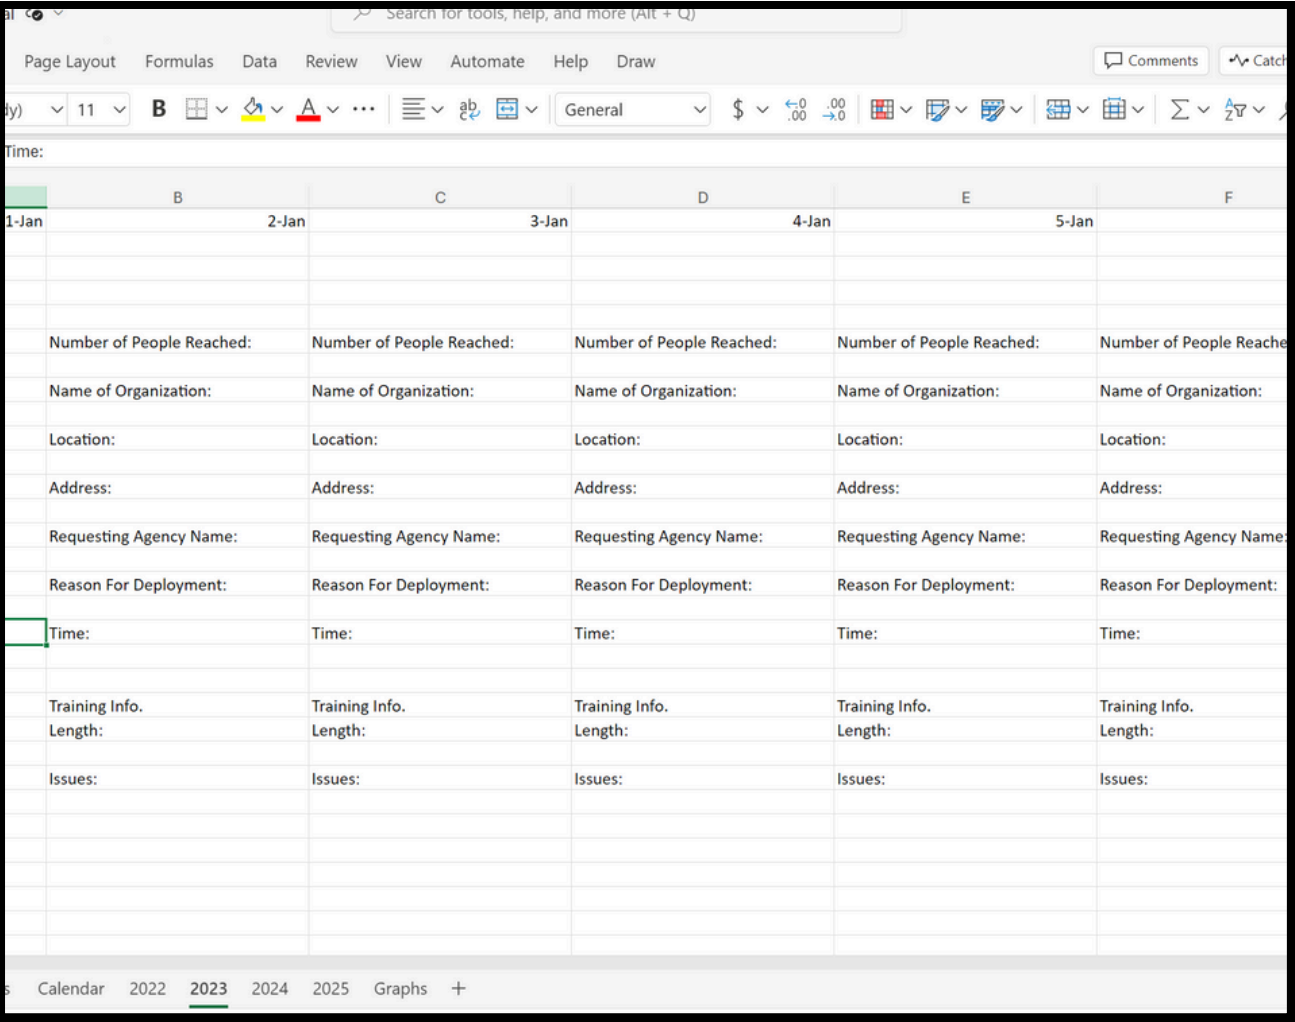

Address
Huff's Numbers use both location and address which i think can be useful. I added a multi-line text box for this option.

Clarification
I changed some wording around to match Huff's Numbers so that there would be less confusion when changing to the forms.

Reorder
I think that I needed to reorder the questions to have a better flow to because I feel like Huff's did not order the questions in a proper way.

AGGREGATE VIEW

I thought it might be beneficial to have multiple aggregate views so I created a sample report that tracks Huff's training and titled it Huff's Progress. I think this will be very useful if and when Officer Tara has more than one dog to train.

This will exist along with the summary report which is the full-scale report that we created last week.

QUESTIONS

Is there a way to create a summary report that only accounts for the last 30 days?

Is there a way to set the default Date/Time within the form to the computer's system date?
